RESIDENTIAL LIFTS

RESIDENTIAL LIFTS

A lift suitable for a residential environment has to fulfil a strict criterion for all involved. It must allow residents to reach their floor comfortably, quickly and safely. Architects demand the best use of available space, as well as an aesthetic design to incorporate pleasantly into their building image. On the other hand building owners seek environmentally friendly, reliable, low consumption solutions.

GLE offer second to none residential lifts that can fully conform to the strictest demands from all parties involved. The **enviroMRL®** is **fast, smooth and quiet** with endless design options.

DESCRIPTION

Vertical solution for small and medium rise buildings from 2 to 11 stops

MODEL

ENVIRO MRL

LOADS

- EN 81-72
- EN 81-73
- AS 1735

SPECIFICATION

GEARLESS MACHINES:

Our range of gearless traction machines offers the latest in permanent magnet gearless technology. **Capable of handling loads from 300kg to 4000kg**, this range of gearless motors boasts extreme durability, the need for very little maintenance, up to 50% less energy consumption and a second to none travel comfort.

LIFT CARS:

We are able to offer a bespoke car design service in which we will design to suit the client's requirements. Our standard finishes include skinplates, laminates, stainless steel, patterned stainless steel, 5WL, linen stainless steel, 316 AISI & many more. **Our lift cars are solid, strong and resistant to ensure a longer lifespan.**

Designed in accordance to all local regulations, our **bespoke COP service** allows you to specify an endless amount of finishes. Be it a vandal resistant push button, an LCD display or an engraved company logo, **we can cater to suit any specification.**

CAR OPERATING PANEL:

Designed in accordance to all local regulations, our **bespoke COP service** allows you to specify an endless amount of finishes. Be it a vandal resistant push button, an LCD display or an engraved company logo, **we can cater to suit any specification.**
